

30 Day Construction Notice: Drumm & Jackson Streets Sewer Improvements

What: The San Francisco Public Utilities Commission (SFPUC) will begin construction to rehabilitate approximately 805 feet of the existing Drumm Street box sewer and approximately 205 feet of the Jackson Street box sewer. The Drumm & Jackson sewers were constructed in 1913 and serve approximately 25% of the City. These critical sewers have severe deterioration and corrosion and are in need of repair. Construction activities will also include several days of potholing along The Embarcadero to locate and assess underground facilities.

Who: Anvil Builders is the contractor working for the SFPUC.

When: The anticipated start date for construction is April 12, 2018 with completion scheduled for end of 2018. The potholing work is estimated to last up to 7 days at each location, and may need to occur during the evening. The timing of the potholing has yet to be determined. Weather and/or construction issues may impact the schedule.

Where: Some exploratory potholing will occur at two locations on the Embarcadero near Pier 3. Trenchless methods for Drumm & Jackson sewers will be used as much as possible to reduce disruption.

What to expect during construction:

- While the contractor is required to abide by the City's noise and vibration ordinances, neighbors should expect some noise and limited dust during this work. The project team will work to minimize disruption to normal neighborhood activity; however there will be occasional inconveniences due to heavy equipment movement and other construction activities.
- Businesses and residents in the work zone will maintain access to their garages, although there may be temporary delays.
- Buses will not be detoured. Traffic will have some temporary delays.
- Parking will be restricted in the work zone. **Please see posted signs for exact details.**
- No interruption in sewer or water service or quality is expected during construction. **Advance notice will be given.**

Services of the San Francisco
Public Utilities Commission

Clean, efficient, reliable...

Every day, we deliver high-quality, efficient water, power and sewer services to serve the needs of the San Francisco Bay Area.

Water – Delivering high-quality water every day

We deliver drinking water by gravity to 2.6 million people and businesses in San Francisco, Alameda, Santa Clara, and San Mateo counties.

Power – Generating clean energy for vital City services

We generate clean, reliable energy to power vital City services, such as MUNI, streetlights, schools and public buildings.

Sewer – Protecting public health and the environment

Through our treatment system and innovative programs, we manage sewage and stormwater, and prevent pollution of the bay and ocean.

Please help conserve water.
